Preface

We have heard countless times from our elders that “knowledge is power.” The vile constructs of the present world have been created by politicians who rule through their collective ignorance! Elders begging on the streets, children dying from hunger, suicides due to overwhelming debts—all these are depravities that exist because of the appalling economic genocide of the poor. These wrongs can be overcome only with the help of knowledge.

I don’t know how you personally feel about such practices; but I can tell you that these indignations have frustrated me for at least thirty years. I believe the way I can best express such concerns is by writing some modern poems that help to illuminate these vital matters.

I strongly believe the idea presented in *THE COLOUR OF YOUR FAVOURITE ROSE* because it is fat-free.

I also believe this book will help you, dear reader, to see the world as it now exists. I urge you to take action to bring about your own positive changes. Any person in the world may make a significant contribution through their talents and dedication.

I am currently developing the implementation of the system I call *Creative Balance for Development* in order to bring financial freedom for everyone and to help stop climate change. Those who practice this system beside any other systems step by step, will feel and see the power and value of this book and also their personal life. If these modern poems touch you deeply, it is my hope that you will join this green movement.

May God help us all.

Sincerely,
Mohammed Mizan

Acknowledgments

The Colour of Your Favourite Rose contains contemporary verses. I am grateful to God for His endless kindness during my 59 years of life.

With encouragement from many others, it became possible for me to compose this book of modern poems.

I especially thank my first mentor Late Syed Ahmed and my father Mokhles Uddin Ahmed. In addition, I also thank Fahim Shahreer, co-founder of the TEGME Literary Society. From the bottom of my heart, I thank poet Mick Burrs who is the copy editor of this book.

I also wish to thank my wife Mela, my three daughters Meem, Momo, and Monte, and my niece Eba Basith, and my uncles Dilwar Hassan and Late T.H. Khan. Furthermore, I thank my friends John Patrick O'Connor, Steve Ali, Mohammad Tamidur Rahman, Sabbir Hassan, Dr. Jahangir Habibullah, and Niharika Yeasmin. Finally, I thank Steven Rampershad, Mahdi Dadashi, Dr. Norman Allan, John Miller, Banoo Zan, Margaret Code, Andi Fox, David Occhipinti—and my cousins Shahidul Hassan, Mohammad Saiful Islam, and Mithila Afrin Khan.

In summation, it would not have been possible for me to compose The Colour of Your Favourite Rose in this short period of time without all these people who I am so grateful to know.

May God help us all.

Prologue

Mohammed Mizan is a new friend of mine. His enthusiasm & sincerity are so encouraging. They are not blustery, but are inspiring in their simplicity and quiet earnestness. Our situation, and the planet's, are dire, and needs hope and faith to change them. I don't know if these are right or perfect descriptions, but we must search for such words because these can move mountains. Mountains need moving. That Mizan is making this effort, I hope will lead us to follow his inspiration.

Best wishes
Norman Allan

Norman Allan,

Thank you for your generous support of Mizan and his modern poetry!

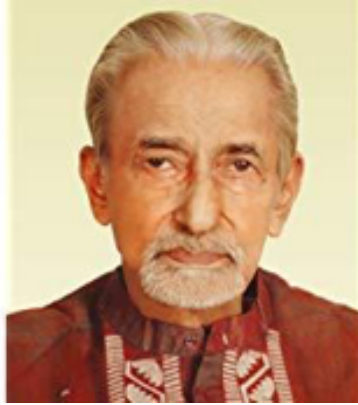

Yours Truly,
Mick Burrs
(Steven Michael Berzensky)

I have known Mohammed Mizan for over four years now. Within this time, our conversations have opened my eyes to many aspects of the current world that are often overlooked. Unemployment rates and debts are growing—while standards of living are falling. More people are experiencing new forms of poverty every day! This book—The Colour of Your Favourite Rose—illustrates these problems and shows us that the way to tackle them is by developing values through education, literacy, and love.

Terry Trowbridge
PhD candidate in Socio-Legal Studies

This book is dedicated to my second mentor Muhammad Bayazeed Khan Panni. He is also known as Imam-Uz-Zaman in his own circle. He was born on the 11th of March 1925 in Tangail British-India. He passed away on the 16th of January 2012 in Dhaka, Bangladesh.

He dedicated most of his life hoping to establish peace around the world among all faiths and genders. The books he wrote and preached were especially created for humanity.

IT IS A PLEA FOR MY READERS & LISTENERS

Hi, I am Mohammed Mizan!
And I would like to share some simple thoughts
to solve our ongoing global financial
and environmental crisis.

The format I choose
is modern poems and songs,
because I like to entertain you
and reach your heart!

One piece of technical jargon
that simply implements
is our “Creative Balance for Development.”
This plan can automatically guide our progress,
prosperity, and a financial stress free modern life.

Therefore, I have written
this book of modern poems
by necessary universal statements
and I named them
“The Colour of Your Favourite Rose.”
This book is online from March 4th 2020
and is now cost-free for downloading forever!

CONTENTS

1. THE COLOUR OF YOUR FAVOURITE ROSE
2. THE DUST OF OUR HEARTS
3. READING BOOKS AND BEING HUMAN
4. WHY WE ARE SO SPECIAL AND POWERFUL
5. MY YOUNGEST DAUGHTER MONTE
6. GLOBAL WARMING
7. WHEN OUR FAMILY STARTED COMMUNICATING AGAIN
8. NOT GOOD PARTNERS
9. MANY ICEBERGS ARE NOW FLOATING AWAY
10. THE POOR DONKEY
11. CITY LIFE TODAY
12. EMOTION IS THE HEART OF POETRY
13. MY INSPIRATIONAL HEROES AND HEROINES
14. I'M FOLLOWING IN SOME VERY IMPORTANT POETIC FOOTSTEPS
15. ACCIDENTS
16. WHAT IS THE VALUE OF POETRY IN EXPRESSING THOUGHTS AND IDEAS?
17. WHAT IS THE BEST LITERATURE?
18. THE PURPOSE OF BORDERS BETWEEN COUNTRIES
19. HUMOR IS NOT ALWAYS FUNNY
20. WHAT IS THE PURPOSE OF OUR READING AND LISTENING TO POETRY AND SONGS?
21. WHO WOULD YOU LIKE TO BE?
22. NO ONE WANTS TO CARRY FINANCIAL DEBT BURDENS
23. A NONVIOLENT MOVEMENT
24. WHY DO WE ALWAYS HAVE TO EXPERIENCE FINANCIAL DEBT?
25. OUR UNHEALTHY LIFE IN THIS MONSTROUS CREDIT CULTURE
26. WHY ARE THERE SO MANY STEREOTYPES?
27. WHAT CAN WE AFFORD?

28. DID YOU KNOW THIS: A GREEDY POLICY IS THE MOTHER OF ALL UNNECESSARY FINANCIAL PROBLEMS?
29. DISCRIMINATION AGAINST THE GUIDELINES OF GOD
30. THE HEAD OF MOST HOUSES
31. SOME POEMS ARE USEFUL FOR CREATING POSITIVE CHANGES IN MANY PEOPLE'S LIVES
32. ARE WEALTHY PEOPLE REALLY HAPPY?
33. APPRECIATION FOR LILY CHUNG
34. POLITICIANS: THE GOOD AND THE BAD
35. WRONG POLICIES
36. ROMEO PIMPS
37. ABOUT FEELING
38. DEAR READERS AND LISTENERS, PLEASE PAY ATTENTION TO OUR WOUNDED EARTH!
39. SOLUTION
40. GOD'S CREATION VERSUS HUMAN CRUELTY
41. IRREDEEMABLE DISASTER
42. COOPERATION AMONG ONE ANOTHER IN ORDER TO ALWAYS AVOID UNFAIR COMPETITION IN BUSINESS
43. CLIMATE CHANGE IS MANMADE
44. THE CLIMATE, THE CRISIS— AND WHAT WE CAN DO ABOUT IT!
45. WE NEED TO GIVE A HOPEFUL MEANS TO SAVE OUR PLANET
46. JOB SATISFACTION—WHAT IN THE WORLD IS IT?
47. WHAT IS LUXURY IN OUR LIFE?
48. WHAT IS PRINCIPLES WORTH?
49. DEAR UNCLE, I AM WISHING YOU WELL
50. THE INCOME OF THE ONEPERCENT
51. DEAR ALBERTANS, WHAT ARE YOU THINKING NOW?
52. VACCINES
53. ABOUT CHINESE CIVILIZATION PAST AND PRESENT

54. RESPONSIBLE
55. OPEN STAGE UPLIFTING (2017)
56. WITHOUT FINANCIAL FREEDOM THERE IS NO FREEDOM!
57. OH, TO BE OPTIMISTIC
58. GENOCIDE IS A HEINOUS CRIME!
59. WHEN SOME OF GOD'S PURPOSES ARE THE POET'S PURPOSES ALSO
60. LIVING A HEALTHY LIFE
61. THE FOUR PILLARS OF ECONOMY
62. PLANTING A GREEN THOUGHT
63. REAL HEROS
64. THE CREATIVE BALANCE FOR DEVELOPMENT IS GENUINE FREEDOM
65. REGISTERED CUSTOMERS
66. REMAIN FAITHFUL
67. HOW NOT TO FEEL TOTALLY HOPELESS
68. A MANIFESTO FOR OUR CONSUMER CAPITALISM
69. TECHNO ECONOMY GLOBAL MEGA ENTERPRISE STANDS FOR TEGME
70. WHO DOES GOD LOVE?
71. ARE WRITERS DOING ANYTHING WRONG?
72. OPEN INVITATION FOR OUR TEGME PARTNERS
73. TEGME'S MAIN GOAL IS TO BUILD A GLOBAL RENEWABLE ENERGY PLANT
74. DEAR READERS AND LISTENERS, I WISH YOU WELL
75. TO DEPEND ON THE KINDNESS OF GOD

THE COLOUR OF YOUR FAVOURITE ROSE

Are you telling me a secret
through your eyes?
What a charming communication!
Now nobody knows what is going on
except you and me.

Even though I am a family person,
I feel my heart is like an ocean—
so many boats can sail around
in whatever way they need to sail.

Now, would you please let me know
the colour of your favourite rose?

By this time, in this crowd,
I have a feeling
growing within me about you—
and I see this feeling
passing from heart to heart.

Yes, love is an addiction for great lovers—
age does not matter here.
Love does not always demand hugs or kisses:
Love only cares about happiness.

Finally, love is not only about time passing—
nor is love only a game for rich people.

Love is a game for honest souls.

THE DUST OF OUR HEARTS

Air is full of dust—
dust piles up in every corner
affecting our thoughts and hearts!
Whenever anything is not cleaned up
only for a couple of days or even less than that
we can clearly see how this dust always piles up.

There is too much propaganda everywhere.
Some of this propaganda is like the dust in our hearts—
while some propaganda may actually cleanse our hearts!

If we do not cleanse the dust from our hearts
then our hearts gradually lose their power
to determine the difference between
what is right and what is wrong.

Good literature and philosophical musings
cleanse our hearts and make them stronger
for our happiness and a more *meaningful life*!

READING BOOKS AND BEING HUMAN

All books don't have the same charm
or give the same pleasure.
When I read a *good* book
I instantly feel some special satisfaction
in *being human*.

Love, respect, and admiration
help to promote a good feeling.
This pleasure is comparable
to the *satisfaction* of reading
an excellent book.

Some people *buy* love and respect.
They may think this life is everything—
but do they actually *feel* the special satisfaction
of
 simply
 being
 human?

WHY WE ARE SO SPECIAL AND POWERFUL

I think now each of us should feel very special.
Sharing this wish, special thoughts, and messages
for a Happy New Year of 2020 to everyone.
With great hope, I am writing some ideas
and reciting, singing, and preaching
for help to stop Global Climate Change,
and the progress, prosperity,
and a financial stress free modern life
for every one of us!

As human beings we are each very special.
I believe in an old message as a new format
which is this: We are all sons and daughters
of Adam & Eve! We all carry our own soul
given to us by God from His own soul!
Now at any time we can change our luck
and do something great and useful
for our mutual human advancement!

MY YOUNGEST DAUGHTER MONTE

I have given different excuses
to my wife Mela
in the last four and a half years
whenever she requested me
to get my driver's licence again.

Last night before I went to bed,
my youngest daughter, Monte, asked me:
“Abbu*, will we finally buy a family car
and have an air-conditioner for our house?”

Softly, I told her:
“Monte, we have to wait a bit longer.
Hydrogen vehicles are not yet available in Toronto.
When we will have renewable energy,
I can buy an air-conditioner for our house—
then we will not feel guilty
because we would not be polluting the air
for our pleasure and comfort!”

My eight year old youngest daughter Monte
clearly understood what I meant.
She said: “Abbu*, you are right.”
Then she gave me a big hug.
She kissed my cheek and forehead.
Happily, I kissed her before I went to bed.

*“Abbu” means “Dad”.

GLOBAL WARMING

French Scientist Joseph Fourier
created the first path
for acknowledging Global Warming
by discovering the Greenhouse Effect
way back in the year 1820.

Since 1988,
I have been equally inspired by David Suzuki.
He is very frightened by the consequences
of global climate change.

If we do not take the right steps now
personally and collectively
to help stop climate change,
there will be tribulation
all over the earth!

WHEN OUR FAMILY STARTED COMMUNICATING AGAIN

It is totally a different kind of pain
when loved ones stop talking
for a long period of time
even though both sides
have their valid reasons.

It is more painful when both sides
have to live under the same roof
and share the same kitchen,
the same washroom,
and the same living room.

The last time my family and I talked
was on the first day my oldest daughter Meem
began attending Ryerson University.
On that day before I left for work,
Meem walked up to me and asked for my blessing
for her successful completion of her first University degree.

After a pause, with joy I told her:
“Meem, you don’t need to ask for my blessing.
Parents always bless their children’s well-earned success.
This is the joyous starting point for our communicating again!”

NOT GOOD PARTNER

Co-operation is the key to success.
Nature provides the best examples:
We know humans and dogs evolved
to serve each other to survive.

And we also know
that bacteria in our guts
help us to digest
while we give bacteria a home.

However, some parasites also exist—
such as fleas, mosquitoes, and tapeworms
that continue to spread diseases.

And so, it remains true
that when human beings take unfair advantage
we verify that we are not good partners.
But we should be good partners
for our mutual benefit.

MANY ICEBERGS ARE NOW FLOATING AWAY

The glacial ice of the North and South Poles
have been forming over billions of years.
But in recent times this glacial ice has been melting
faster than at any other time in our history!

Now there are huge carbon footprints
left behind by many countries.
Many of us are technologically advanced
yet we do not understand severe climate change!

How can a nation as advanced
as the United States *opt out*
of the Global Climate Change Initiative?

Many icebergs are now floating away from the North Pole.
Here is the final warning facing our human race:
The consequences for human and animal life
are alarmingly threatened.

Now if the glacial ice does not stop melting
most countries will eventually *sink* underwater
except for the highest mountain peaks!

Thousands of mountains have recently
been discovered underwater.
Some underwater mountains
are taller than Mount Everest!
Who among us now knows when and how
another disaster might destroy our entire earth!

THE POOR DONKEY

Once a donkey
was crossing a river
with a load of salt
on his back.

Midway through the river
that donkey realized
to his surprise
how the load of salt had disappeared
into the muddy water.

Now the next time
the donkey went to cross that river again
with his master's load of cotton—
what happened to him is not a mystery
except to that poor donkey himself!

CITY LIFE TODAY

City life is expensive
so it has to be more productive.
It is common to think that there should be
enough opportunities for everyone.

But what kind of advice is this
when the Governor of Canada's Central Bank—
Stephen S. Poloz— recommends jobless youth
should *work for free* to gain experience
for their future jobs!

If we consider young people are our future
while *many* face unemployment
after they graduate from university or college
what hope is there for anyone else?

Isn't it time to think about
the type of leaders and policies we need
to create *real progress* with *real happiness*
for our *financial stress-free* modern lives?

EMOTION IS THE HEART OF POETRY

Before I started my school life
which included reading and writing
I recited poems inspired by members of my family.
While not always understanding
the meaning of those poems,
I was able to memorize them
and recite them at my family's request.

II

Now I realize—as a poet myself—
that emotion is the heart of poetry
and its messages are poetry's brain and soul.

For me, rhymes are the charming legs of poems
while their hands are those statements
that inspire most of us with hope
and motivate us as open-minded people
to do what is right and always be alert
concerning the negative spirit of evil.

III

The glamour of poetry is its beautiful metaphors,
while the aim of poetry is always
to touch both its readers and its listeners
through their feelings and thoughts.

For many centuries both poetry and songs
have been powerful means
of expressing our own humanity.
While all poems do not always become songs,
it is true that *all songs are poetry*.

MY INSPIRATIONAL HEROES AND HEROINES

Climate change is the biggest threat
that the human race has ever faced.
There are always environmentalists
such as John Muir, Aldo Leopold, Robinson Jeffers,
Edward Abbey, Kelly Johnson, Al Gore, Vandana Shiva,
David Attenborough, Amory Lovins, and many others.
Some are dedicated climate activists—
while many others are not yet serious about climate change.

David Suzuki and Wangari Maathai should be everyone's inspiration
for acknowledging our need to understand global climate change.
Regardless of the criticisms and other forms of harassment
by vested groups for their own venal gain.
So many people have dedicated their entire lives
for human advancement despite the obstacles they face.
Kenya's Wangari Maathai and many other people
are dedicated to continue planting millions of trees in Africa.

The Wangari Maathai Green Belt Movement
has spread to some other African countries
that contributed by planting over thirty million trees
in Kenya, the Congo, and other neighbouring countries.
Wangari Maathai's campaign still encourages
men and women in Africa to plant many trees
in their local environments while thinking ecologically!

Wangari Maathai is the first African woman
to receive the Nobel Peace Prize in 2004
for planting millions of trees in Kenya.
Such a strong dedication
is why Wangari Maathai and David Suzuki
are now my inspirational heroes and heroines!

I'M FOLLOWING IN SOME VERY IMPORTANT POETIC FOOTSTEPS

Once upon a time, poetic metaphors
were one means of expressing messages
that could enhance human advancement.

After the French Revolution ended in the 18th century
many advanced countries have learned to enjoy
freedom of speech as well as freedom of thinking.

Now I ask myself:
Why do so many of today's open-minded people
not consider our current socio-economic illnesses?
Why do we not comprehend
the unfair systems in our daily lives?

*Also, why do many of us not think seriously
about our global climate changes?*

Why are we not thinking collectively for the sake of the Earth?
How can we change from using fossil fuels
to generate renewable energy at a faster pace?

Just before the creation of the League of Nations
some people started to write a new style of poetry.
They hoped to spread their messages widely and effectively.
These poets did not care very much
about rhyming words and using metaphors.
Rather than choosing the formats
of fiction, prose, essays, or playwriting—
these writers simply chose a poetic format
by making their focus the need
to spread urgently and creatively their messages.

Now I express my total solidarity
with the souls of those reforming poets
by following in their inspired footsteps
in my own poetic compositions!

ACCIDENTS

Accidents are not all the same.
Some are sources of connection.
Some last forever.

Some cause pain.
Some scare us forever.

Some make us bid farewell—
and we say, “Rest in peace.”

But are all these creations only accidents?

It cannot be!

God is the master planner
of all His creations.
Yet most of God’s creations
are still unknown.

WHAT IS THE VALUE OF POETRY IN EXPRESSING THOUGHTS AND IDEAS?

Poems and songs
are powerful means for spreading
thoughts, ideas, feelings, and visions.
Yet many people may not understand
the purpose of traditional poetry
mostly because of its metaphors.

Nowadays many people do not read poems.
Instead, they prefer reading fiction or non-fiction
and the headlines in our daily newspapers and/or blogs.

Writing prose—non-fiction and fiction—is the norm.
It takes time to compose a traditional poem
mainly for its metaphors and/or rhyming words.
My question is: What is the point of spending lots of time
to compose a traditional poem or a more modern poem?
Now less people read and understand the messages
of poetry's traditional beauty and importance.

One reason traditional poets tend to be financially poor
is because they are devoted to their skill and expertise.
Some may also lack other means of income—
yet many poets remain rich in their passions.
Isn't this dedication also the true worth of humanity?

WHAT IS THE BEST LITERATURE?

With or without our knowledge
our lives are echoed
mostly in news, stories, songs, and poetry.

Literature also covers
our human reasons for deprivation
through wars and other conspiracies.

If we do not study literature
will our hearts still develop an understanding
only from nature?

Over countless centuries some human beings
have created many inspiring stories.

I believe the best literature
has the power to open up our hearts
and is inspired by our connections to God.

THE PURPOSE OF BORDERS BETWEEN COUNTRIES

Currently some world leaders might thinking
of abolishing their shared borders.

A few leaders are also thinking
about building new borders.

I believe this is the *wrong timing*.

Before the Second World War
Great Britain and France
were the two leading super powers.

After the Second World War
the United States and the Soviet Union
became the two *new* super powers.

Now the United States sometimes believes
they are the *only* Super Power
so it can positively change *any* of its policies.
This is what Abraham Lincoln did when he was President
after the successful end of the American Civil War in 1865:
Lincoln abolished slavery
through the instigation of the Thirteenth Amendment.
Yet it took another whole century
for those former slaves in the Deep South
to actually feel they were *truly* and *completely* free!

Without financial freedom
people are not actually free at all!

HUMOR IS NOT ALWAYS FUNNY

Everybody loves comedy.
Stand-up comedy, political satires,
and humorous books amuse us.
Laughter is healthy for hearts and minds.
But we sometimes forget
what our messages actually convey.

Comedy is a literary practice.
A good comedian has the power
to make his or her audience reflect
on their own behaviour
concerning various issues
in our current world.

But comedians sometimes get a cheap laugh
when they attack someone else's feelings.
Not all "jokes" are funny.
Comedians should always respect
someone else's feelings and promote situations
that achieve mutual benefits.

WHAT IS THE PURPOSE OF OUR READING AND LISTENING TO POETRY AND SONGS?

Some people read and listen
to poems and songs for entertainment.
Other people listen to poetry for their messages
like passionate farmers who open up
thousands of oysters and clams
hoping to find *one beautiful pearl!*

Enthusiastic readers who believe in their hearts
that there are charming poems in every *language*
which simply seek a progressive and joyful life.

Anyone who reads and listens to poems and songs
and who also understand their deeper meanings
so they may experience
the cleansing of the dust in their hearts.

Such passionate readers
now have greater opportunities
to be more open and more thoughtful
because our souls will feel rejuvenated.

WHO WOULD *YOU* LIKE TO BE?

Perhaps everyone would like to be someone great—
like their Dad, or Steve Jobs,
founder of the Apple Corporation,
or a famous scientist like Albert Einstein—
or anyone well-known male or female
who is their favourite celebrity.

We know the sweetest dreams are full of imagination—
and we know how dreams instil
high hopes in the hearts of children.

But when many of these children start to realize
the existence of poverty and hunger
by listening to arguments between their parents
including non-stop fights—
then the unfortunate sadness that results
becomes painful in each child's daily life.

*This is how many children's sweetest dreams
may gradually start to fade.*

Here then is the harsh truth
not only for broken families,
but also for single parents
all over the world!

Yet many people still believe
that our socio-economic system
may create a progressive society.
How do *you* feel such modernization as this?

NO ONE WANTS TO CARRY FINANCIAL DEBT BURDENS

Human life could become more precious
when it is financially debt-free, progressive,
and feels a connection with the soul of God.
People normally don't think about
the purpose of human life and God,
when people are involved
in unfortunate financial debts,
and then they might think only about this life.

In our present socio-economic system
most of our debt burdens
are getting bigger and bigger.
No one wants to carry a financial debt burden.
Very often so-called good debts
such as buying property with mortgages
become bad debt when the real estate market falls.
Still, most people try their best
by working more hours while spending less money
to get rid of their painful financial debts
as quickly as possible.

After years of experiencing so many bad debts
most people slowly lose their confidence and courage
to become a solvent and progressive person.
Therefore, they may not think about being creative
or about the value and purpose of their own humanity!

A NON-VIOLENT MOVEMENT

The world has learned from Mahatma Gandhi
the possibility of a non-violent movement
that serves progress and freedom for all people.

Violence serves only those situations
that grow from bad to worse
creating more violence, more hatred,
more revenge, and more retaliation.

This “tit-for-tat” approach can never be
the best solution for any dispute.
But the Creative Balance for Development
has the power and strength to solve
many disputes through its simple practices!

How do you feel such modernization as this?

WHY DO WE ALWAYS HAVE TO EXPERIENCE FINANCIAL DEBT?

One percent of the total population
have fortunes that are growing every day.
They have hundreds of times more
than average wage earners.
Greedy people already have enough wealth
to provide many generations—
so why do they still grab
others' fundamental rights
and deprive those who are poor,
those who are vulnerable?

Financial victims don't even have the strength
to defend themselves.
In fact, most of us are fighting to survive
and many of us are becoming very tired
struggling to pay our bills on time without interest.
When we don't have to borrow more money to survive
we believe we will truly be happy.

Even without a recession
our debt-burden is going up and up and up!
We don't even know how and where this burden will end.
How many times do we have to experience being bankrupt?

OUR UNHEALTHY LIFE IN THIS MONSTROUS CREDIT CULTURE

There are many hair-care products
that are good only for those who have hair.
There are also many skin-care products
that might be good up to the age
of seventy-five or older.
Yet painkillers are always good
for everyone at any age of life.

There are many good books about financial freedom
on how to become wealthy while saving money.
These books are good only for those who have saving power
and have a permanent well-paid job—
or have any source of permanent income
including investments in stocks and bonds
or property ownership or any other sources.

Everyone should know there are rules of credit
mainly for those who live in our credit-culture.
If we are ignoring these rules of credit
we may end up paying a penalty
while not enjoying any benefits at all!

If you know the rules of credit
and the tricks of our greedy financial system,
you are in less danger of being nailed down
by this monstrous credit culture.

Many of our children and grandchildren
are applying for credit cards
some before they even finish high school!
Yet they are not being educated
about financial literacy in schools.

Most of our children and grandchildren
have not yet learned the rules of credit.
Our credit system is very negative in its effects,
especially when our children themselves
become the victims of this very unhealthy system!

WHY ARE THERE SO MANY STEREOTYPES?

Yes, there are many stereotypes
such as: all Arabs and Muslims are terrorists,
all native peoples are barbarians,
all Jewish people are greedy,
all Mexicans are drug dealers etc.

Even though these are all stereotypes
they do not describe any of us as individuals.

It does not make any sense
to lose most of our positive energy
by blaming each other and complaining
or criticizing our politicians about everything!

We Canadians enjoy religious freedom,
freedom of speech, and social justice.
We each experience many other social benefits
including most of us who are living
in our ancestral homelands.

What is it that stops us from thinking openly?
Concerning those of us who reside in Canada
do not realize this land has been stolen
from its native peoples!

It is easy to forget that we are not native to this land.
Canada now contains many English, French, Spanish,
Portuguese, Italian, Dutch, as well as Native peoples
and descendants of many other immigrants.

We all have our own place in this land.
We all should stop blaming each other
so we can start thinking about how to bring
positive change towards true prosperity & modernization
is for everyone's debt-free, progressive, and joyful lives.

We Canadians no longer should deprive our first nations
that our ancestors colonized when they first arrived here.
This land now belongs to all of us regardless of our skin colour
and our languages and our religions, etcetera!

WHAT CAN WE AFFORD?

Every child once in awhile
wants to go to places they especially enjoy.
In Toronto such places may include
Wonderland, the CN Tower, MarineLand,
the Royal Ontario Museum and other common places.
If the child's mother or father say "No"
some children may not understand why.

Some children are so young
they may not know yet about adult problems
such as minimum wages and going to work on-call
covering other kinds of people's financial instability.

So many workers whether they were born in Canada
or moved here may not have permanent jobs.
But some workers must have two part-time jobs—
or sometimes even three part-time jobs
simply to survive!

There are also parents who cannot afford
to take their children to many common places in Toronto
like movies and the Ontario Science Centre
and even picnics such as other parents do for their children.

These are very unfortunate parents
who experience unspoken pain and anger.
There are also many people
who cannot even think about
giving birth to children or adopting a child.

Being poor therefore is the common misfortune
for these families experiencing such shame
that they are forced to seek welfare
which often includes going to food banks
simply to survive!

Now here is another alarming fact:
More than One Million Torontonians
used Food Banks in 2019!
It may be hard for many of us to believe this—
but this shameful number is growing and growing.

Since it opened its doors in 1980
the Toronto Food Bank
serves as a band-aid solution
for an ongoing and shameful food crisis!

Isn't this the right time
to think about a progressive policy
which all of us need to experience
in order to enjoy a decent and dignified life?

DID YOU KNOW THIS: A GREEDY POLICY IS THE MOTHER OF ALL UNNECESSARY FINANCIAL PROBLEMS?

I want to express with great hope
what I have understood
and honestly believe about economics:
A greedy economic policy causes
most people to lose their opportunity to save money—
as well as any form of investment for future success!

Most of our debt burden is going up
even though those who purchase
their house or condominium
are forced to do so when acquiring loans.
Sometimes it is possible to buy
a house, condominium, or land
with a down-payment of zero to five percent.
But often many mortgaged property owners
cannot imagine the terrible consequences
when they lose their only source of income!

Many citizens often end up behind
in maintaining their basic necessities.
Most of our demands are sadly premature.
Few people who save and invest
through the stock market and/or real estate
discover after seven, ten, or twenty years
that most of their savings have dried up!

From 1970 to 2019 America faced seven recessions.
But from 1910 through 2019,
including the Great Depression in the 1930s,
did you know how many recessions actually occurred?

Greedy economic systems generate unspoken hatred,
anger, frustration, and bloodshed—
and often do so in the name of progress and freedom.
Now in many countries around the world
wars are triggered in the name of freedom and national security!

Did you know this: just a simple touch
of the creative balance for development theory
is able to transform most of our lives
into a financial stress free modern life with dignity!

DISCRIMINATION AGAINST THE GUIDELINES OF GOD

The world we are living in
is *not* a perfect world.
It will never be perfect
because few greedy people are depriving most of us.
Now the earth would be a better place for humanity
if we practiced God's Guidelines in our every level of life.

Unfair desires and greed will never disappear
until we know the richest possible outcome
from the Guidelines of God.
In parts of the world some people
are now distributing their wealth
in different ways than our ancestors did.
We became more educated, more open-minded,
more talented, and somehow more tolerant!
I feel as an open-minded person
that we also have some responsibilities.

Now we know if any politician or party
discriminates against one community—
it should not comfort other communities
for their own political gains.
When political authority targets other communities—
no one is safe!

Remember this:
before World War Two
Hitler came to power democratically.
He was a popular leader initially.
He pointed out to his nation
his own common enemies—
which in his own mind
were Jews, Gypsies, and Homosexuals
who had no relationship to each other.
It was long after this shocking revelation
that this dictator managed to turn
most of the remaining world against himself!

Slavery, deprivation, and genocide
are all dirty games.
From this perspective we who are civilized
apologize for our ancestor's wrong practices.
Slavery is one of the darkest chapters and is unforgettable—
there are so many people who are ashamed
about all these evil practices.

Still, there are human beings
who publicly use their own words
to communicate with their like-minded followers.
When evil politicians such as Hitler in his prime
acquired so much power and spread so much hate
Humanity itself revealed its own shocking nature.
For example at the present time
India's Prime Minister Norender Modi
is proving that he is another evil being
with his treatment of the Muslim minority.

THE HEAD OF MOST HOUSES

The head of most houses
through the Government itself
might either bring unexpected problems—
or progress, prosperity, joy and happiness—
in other words, a financial stress-free modern life.

Unfortunately, the heads of almost each house
do not always realize the truth.
Instead, their egos may emphasize
the practice of misguided policies.

There are no genuine peaces
anywhere in the world—
although there are no shortages
of talent, technology, and resources.

The general problem is this:
We are not now following
what is referred to here
as the Universal and Progressive
Guidelines from God!

**SOME POEMS ARE USEFUL
FOR CREATING POSITIVE CHANGES
IN MANY PEOPLE'S LIVES**

There are many types of poems:
some are imaginary, some are visionary,
and some are practical statements
with creative urgent messages.

Sadly, not many people read poems nowadays.
Yet some poems still have motivational power.
These poems can transform people
from feeling helpless to feeling hopeful.
Romantic poems are still the most popular
because they touch our very human hearts!

Fortunately, I prefer composing poetic statements
to inspire readers and listeners with greater hope.

I try to show my readers and listeners
our common socio-financial problems and their reasons.
I also want to bring people to a step-by-step simple solution
on how we might solve our unfortunate global financial crises
helping to stop global climate change!

I feel very happy when people understand these messages.
I also enjoy motivating people so they do not feel
deprived of their common humanity.

ARE WEALTHY PEOPLE REALLY HAPPY?

More than a decade ago
on one sunny afternoon,
I was driving in downtown Toronto
while listening to 99.1 FM.
Bill Gates, the wealthiest person in the world,
had just donated Five-Million Dollars
to Harvard University where he had studied.
Now Bill Gates' primary aim is to find out:
"Are Wealthy People Really Happy?"

While I was listening
to that CBC-FM radio show,
I was quite surprised to find out
"No Person Can Be Both Rich and Happy!"

The people who conducted this study
at Harvard University wanted to know:
"Why are the very rich not happy?"
Their only answer was:
"Yes, we are wealthy,
but we do not have
enough wealth!"

Oh? Dear Sir and Madam:

“How much more money do you really need?”

Most of the very wealthy people replied:

“We Need Twenty-Five Percent
more Wealth!”

This is my personal opinion:

“For very wealthy people to become happy,
they should not always compare themselves
to those others who are richer than they are.”

Yes, Dear Readers,
very wealthy people
should compare themselves
to poor people.
Do you also think so?

APPRECIATION FOR LILY CHUNG

We are all consumers and providers
in every community we belong to.
Everything we do, no matter how small,
is what we hope will be appreciated.

One of the Board of Directors says
of the condominium Carrington On the Park:
“I am Lily Chung.”

Lily is not a young girl anymore.
She was born under Japanese occupation
before the Second World War began.
She escaped to Hong Kong
after Mao Zedong seized power in China.
She grew up under British colonial rule until 1968.

Now Lily Chung says: “I am enjoying a free life in Canada
with people of many different countries of origin.
In our monthly gatherings with our residents,
I feel it is our responsibility to inform new residents
about the proud tradition we have developed.
In the Carrington On the Park building
all of us try to treat everyone with love and respect.
We are all here to provide the best service
to improve our skills and to rectify our mistakes.
The Superintendent, the Janitors, and the Concierges,
the Owners, the Management Team, and other residents—
all of us deserve to be equally appreciated
in our role for running our small community.”

I, Mohammed Mizan, also have come to realize
that I have a responsibility to dedicate my talents
for this worthwhile tradition
for Lily Chung and many others
in appreciation proving to be
a stronger currency than money itself!

POLITICIANS: THE GOOD AND THE BAD

This is a most crucial time
to decide about the future
of the great majority of us
as well as the future of our Earth!

We need politicians like Abraham Lincoln,
Mahatma Gandhi, Tommy Douglas, Nelson Mandela,
Vaclav Havel, Bayazeed Khan Panni,
and Angela Markel guiding today's Germany.

Except for a few politicians,
most politicians lack vision
and many are now puppets
of the One Percent Club
serving their own interest
instead of the needs of all vulnerable people.

These politicians deprive their own people
by creating a crisis, then offering very little
in job-opportunities and income equality.
As a result, we see one percent of people's income
now going to the Ninety-Nine Percent Club!

Many politicians take unfair advantage
of racial and religious minorities
by abusing nationalistic sentiments
in the name of security and freedom
mostly whenever it is their time
to invade other countries.

To survive, many people are forced
to sign-up for their national security forces.
These young soldiers die too often
on foreign battle grounds.
Many soldiers lose their legs and other body parts
while politicians and arms dealers,
food suppliers, technology experts,
and many other business leaders are not acknowledged
when they toast themselves with champagne!

WRONG POLICIES

Most
of
the
time

a
ruler's
wrong
policies

and
arrogant
nature

make
entire
nations

acquire
more
enemies!

ROMEO PIMPS

Poverty is the mother of all victims:
It is fuelling sex trades all over the world.
The Toronto Star has named
the perpetrators “Romeo pimps.”

In Ontario, the sex trade
is one of the fastest growing crimes.
The trafficking of thousands of teenage girls every day
as well as other young women by “Romeo pimps”
is a social crisis!

Other sex-trade gangs are perpetrating
such atrocities every single day.
Buyers and suppliers of the sex trade
are enjoying their ruthlessness
by manipulating these helpless girls and young women.

In Ontario, some girls as young as twelve
are starved, abused, and humiliated by pimps.
Many of these young women are forced to sleep naked
on a cold floor like some unfortunate dogs.

Few of these horrors make the news
so we are naturally appalled
by all such terrible indecencies.
Open-minded people everywhere
cannot and will not accept such horrors.

ABOUT FEELING

I am still feeling your innocent smile
from a distance eye to eye in our Anthology launch.
After a couple of seconds you lovingly hugged me
and with a mutual smile we started our little chat.
I feel that moments are still eternal
which I enjoy several times almost every day
with my eight year old youngest daughter Monte.
Even I sometimes go through difficult times.

Yes, dear Gisele, let's think this way about our connection.
It was not our plan, but we are *all* part of God's master plan.
Now this innocent feeling has been created
because of our freedom of thinking and will power.

"My Youngest Daughter Monte" is not only a poem
she is a special part of our family life.
"*Dignity*" is another piece of work
which has also been published in VOICES 2020
where I have not only described about *my* feelings
but also to express *all women's dignity!*

To see the consecutive selection of my modern poems
in the Anthology “VOICES” of the Toronto Writers Co-op.
VOICES 2018, 2019, and 2020 published six of my poems.
Five of these poems belong to my first English book of poetry
which I call “The Colour of Your Favourite Rose.”
Now I feel my confidence has been boosted
to represent our green movement at the next level.

I believe this book of modern poems
is able to open people’s eyes
and it can clean the dust from most of our hearts.
This book will work as a key to open our luck
and motivate open minded people to join
our green movement anywhere in the world.
This movement should help each of us to solve
our global financial crisis and help each of us
to stop our unfortunate climate change!

**DEAR READERS AND LISTENERS,
PLEASE PAY ATTENTION
TO OUR WOUNDED EARTH!**

Please forgive me
if you think it might be worthless to spend your time
reading or listening to my literary works.
My deepest concern is our mutual need
to re-shape our wounded Earth.

Every person who lives on Earth
has the same right and responsibility
to take care not only of their own health
but also the health of all those they love.

I believe we all may benefit
from a dynamic and universal financial plan
that can serve as a creative balance for development!

Every society has rich and poor people.
We all know those who are wealthy enjoy special benefits
because of their spending power.

More so, I believe people who are relatively poor
need fair opportunities
so they may also experience
a financial stress-free modern-life with dignity!

SOLUTION

For every problem
there is a solution
discovered or unknown,
invented or ignored.

If we know the solution
we need the courage
to use our own knowledge.

Technology is compact knowledge.
Those who don't know this
end up abusing it.
We can only watch helplessly
when and how our lives turn to hell!

For our ignorance
we always blame bad luck or God!

GOD'S CREATION VERSUS HUMAN CRUELTY

Something wrong is happening everywhere:
God is not the one who is being cruel to us.
Although we are His beloved creation
some of us are making His creation an ugly mess
in the name of progress and freedom.

Who is the creator of the universe?
He cannot be grasped by our imagination.
If we compare our world with the universe itself
our world is only a drop of water
in the ocean of God's creation.

Since we cannot imagine all of Canada,
or Paris, or Moscow, or Berlin, or Beijing,
or London, or New York, or Tokyo, et cetera—
how can we be expected to imagine
the Creator of the Universe?

Let us think wisely about God's kindness—
and His beauty, His strength, and His wisdom.
Yet some people may not believe in God,
but most of us depend on Him
while God does not depend on anyone for anything.

God is mentioned in His guide books
where He gave us some reasons
behind His beautiful intentions—
to create something miraculous—
with each one of us

IRREDEEMABLE DISASTER

Many people are not super-talented,
but we can feel, see, and believe
that at the end of this century
there may be no human race
living on this earth!

A space station cannot save our species
from this eminent irredeemable disaster.
Only God can save us from this crisis!

It is my personal belief
that if we have enough talent,
technology, resources, and will-power
then we may continue living on this planet
for millions of years.

Unfortunately, we do not exercise
a distribution policy given to us from God
to continue our progressive and peaceful lives!

As a result of our tendency to forget
our ability to experience true love—
and to respect and enjoy happiness—
unfortunately we may continue to experience
only deprivation, hate, and war!

**COOPERATION AMONG ONE ANOTHER
IN ORDER TO ALWAYS AVOID
UNFAIR COMPETITION IN BUSINESS**

Our Creative Balance for Development has been designed based on love, respect, and cooperation among one another in order to always avoid unfair competition in business.

Our goal for Creative Balance for Development as a theory is to allow communal growth according to human advancement and ideas in the hope of bringing financial freedom for everyone.

The first verse of this theory is:

“To enjoy profit on a priority basis.”

Without customers, idea, merchandise, and manpower do not generate profit. Therefore, in the Creative Balance for Development theory customers have the first priority to enjoy part of the profits from every transaction as a contributed dividend mainly to finance global renewable energy projects at this time.

The first slogan of Global Mega Enterprise like TEGME is that “rich people will always get richer based on their spending power. Other people should also have their fair opportunities to generate secure wealth with respect and pride.”

CLIMATE CHANGE IS MAN-MADE

Our world has been ruled by so many systems
that democracy is dominating us at present.
Yet wealth belongs mainly to the one percent
who don't even care about climate change!

Human dignity is now under threat!
A flag has been raised
by the Techno Economic Global Mega Enterprise
in a short form that we call TEGME
to define this pioneer Global Mega Enterprise
as an intimate connection for everyone.

One verse of "Creative Balance for Development"
mentions clearly and will repeat a few more times
that is "minimum two point five percent revenue
and this revenue goes to contributed dividend account.
The shareholders and permanent employees
of these enterprise also enjoy the same amount
of contributed dividend in order to re-generate profit
from our green business."

Without practicing a dynamic economic plan
like a "Creative Balance for Development"
then our socio-economic situation
will unfortunately remain the same
or get even worse!

THE CLIMATE, THE CRISIS— AND WHAT WE CAN DO ABOUT IT!

Do we now realize the terrible consequences
of destroying this precious planet?

Do we even care about the awful results
since we have been melting the permafrost?

Our current sea levels are now rising
and threatening to bring our entire planet
into irredeemable disaster!

It should not surprise us
if and when measly cockroaches
end up inheriting our mother Earth.

This is now the way we human beings
once dominated the world.

Yes, once upon a time there were dinosaurs
who dominated this planet.

There is now scientific evidence
we human beings started living
on this planet not that long ago.

Sharks, mammoths, alligators, and many other species
began living on this planet even before human beings did.

Some of these species are still living with us
while many are not living with us anymore.

Now it is necessary for all open-minded people
to come up with some progressive ideas
trying to resolve our ongoing climate crisis.

I sincerely believe in our need to practice side by side
a Creative Balance for Development Plan
which may become one of the best and balanced policies
at least for this time, try to help stop climate change
as well as providing a total solution for our global financial crisis!

WE NEED TO GIVE A HOPEFUL MEANS TO SAVE OUR PLANET

The fortunate among us see the news
of tornadoes, hurricanes, wild fires, and floods etc.
happening frequently around the world.
The unfortunate ones feel the effects of these disasters.
Some lose their home, their crops,
or even their loved ones.
But there is very little that most of us can do
except through donations or volunteer work.

Now imagine the world of your children & grand-children
where climate change is showing its effects.
Now there are many stronger tropical storms,
wild fires, severe droughts, and other devastations.

If there is so little we can do now to affect climate change
what can we do to save our delicate future?

We now know that very rich people and politicians
don't always hear our honest pleas for attention.
Very rich people don't even offer an iota of hope
yet they could help us to prevent this severe crisis.
They have the wealth and hopefully some wisdom
for understanding climate change.
They could take action now to stop this world situation
from dying before it ruins our Earth entirely.

JOB SATISFACTION—WHAT IN THE WORLD IS IT?

For those who respect their job
as well as their workplace
it may become their place of worship.
Those who are not passionate about their job
may end up hating their workplace—
unfortunately, their lives then become a terrible mess.

However, except most privileged persons,
people by nature want to love their work.
When they have a healthy working environment
then even the hardest job can become joyful.
But no one benefits in a workplace
that is deprived of sufficient wages
because it does not respect their own talents.

Labour unions in many work places
are not always helpful to workers—
since the time Margaret Thatcher
and Ronald Regan got elected
for the highest office in their countries.
This situation has now become a serious problem
for the growth of most Western Businesses.

Therefore, job satisfaction remains a vital issue
since most workers still do not
experience job satisfaction!

WHAT IS LUXURY IN OUR LIFE?

The freedom to choose a lifestyle
is in fact a luxury of life—
but it is possible only if you have
complete financial freedom and wisdom.

With the Bahamas, Cuba, Miami, Paris—
we see ads for a perfect vacation.
But it is impossible for most of us
because we may lack our own financial freedom.
Even our education, talent, skill, and dedication
cannot provide financial freedom nowadays for most of us.
Why is this so?
Because one half of this present model
of economic system is out-dated
while the other half of this economic system
is often overused as advanced technology in every aspect.

In many situations most people will generate financial debt.
Therefore, many people slowly lose their confidence,
their courage, and finally their morale!

What is the best way to get rid of our common crisis?

By the grace of God almighty
the Techno Economic Global Mega Enterprise
has come forward with a dynamic & transparent policy
which is the Creative Balance for Development—
a totally open modern approach free for use by everyone!

Another verse of this Cbfd theory is telling its followers:

“Wage gap from top to bottom is not more than six times based on that province, state, or country’s minimum wages. Benefits are separated for permanent employees.

First, enterprise has to make thirteen percent net profit in a fiscal year after that remaining profit gets distributed half and half among the shareholders and the permanent employees.”

From the moment any person practices the Creative Balance for Development Theory through any Global Mega Enterprise like TEGME they must start to enjoy more financial freedom! They may then feel and see their financial growth expanding so they will enjoy at least a week in a year of luxury in their life.

WHAT ARE PRINCIPLES WORTH?

If something is not universally effective,
it has no principle worth.
I believe in an economic plan—
a debt-free, progressive, and joyful life for everyone.

Even though you may make money,
it might not be enough for your survival.
Still, most of us strive to survive
by keeping any type of job
that we feel is necessary.

Now what is the highest goal of humankind?
Is it to try to solve the climate and global financial crisis?
This could be a profit-sharing business theory
such as the Creative Balance for Development
whose every transaction always generates profits!

When businesses share their profits
with both their customers and permanent employees
it helps to build a healthy relationship
among employers, employees, and consumers.

Profit-sharing is one of the oldest marketing practices.

We have many examples of this practice.

For instance, Canadian Tire produces

Canadian Tire money for its customers—

and Shoppers Drug Mart offers

“optimum points” for its customers—

while Esso Gas shares its Esso Points with its customers.

Air Miles are also given as reward points

on behalf of many other businesses.

In fact, all such reward points serve

as contributed dividends.

The idea of Creative Balance for Development

involves mutually re-investing mainly contributed dividends

mostly to generate environmentally friendly energy projects

as well as many other environmentally friendly projects

that generate profits for all of its interested customers

so they may experience their own financial freedom!

DEAR UNCLE, I AM WISHING YOU WELL

Dear Uncle, I hope you are doing fine.
Now it is almost two months
since we have been out of touch with each other.
Almost every day I walk past where you live
many times leaving a message on your phone
and I also email you, but receive no reply.

I like knowing you as a responsible person—
not only as a talented person.
In the last three years
you have contributed your talent
to my literary works.

I am wishing you well
and I hope God will continue
to help us all.

THE INCOME OF THE ONE-PERCENT

Without the knowledge of God and His creations
people cannot feel the real meaning of human life.

Therefore, many people's happiness and good times
depend on booze, drugs, and hookers!

And some even neglect their own family
for the madness of personal gain!

Even though many of us are "educated,"
most of our hearts have not developed yet
so that the distribution of wealth
still remains only about one-percent
of people's annual income.

And this annual income
belongs to the ninety-nine percent
of both the fortunate and the unfortunate!

DEAR ALBERTANS, WHAT ARE YOU THINKING NOW?

We Canadians are the second largest nation in the world
surrounded by the Pacific, Atlantic, and Arctic oceans
and our big brother the United States.

For our Canadian population of at least 37 million people
and our nearly endless resources
it is our neighbour Alberta that is blessed
with its oil, gas, minerals, and their large prairie farmland.

However, with our greed
we sometimes forget about our precious Earth.
If we do not take action right now
most of climate scientists' opinion
we are bound for extinction by the end of the century!

Why do we accept this current madness?
On February 2019, three thousand convoys
were claimed by Albertans protesting
in front of our national Capitol Hill.
Now Albertans want to build
a new pipeline for more oil exports.

Dear Albertans: Here is my question to you—
We can mine for another month, or another year,
or even another decade!
But what is the point of having such urgent concern
if we all might be dead by the end of the century!

VACCINES

We are so glad
vaccines have been developed
to fight against many viruses
to help preventing premature deaths!

Is there any vaccine for the global economy
like the “Creative Balance for Development”
which fights against climate change
as well as abject poverty.
This promises to fix the ugly mess
and to help everyone to enjoy progress & prosperity.

Without practicing our Creative Balance for Development
through reading, listening, and singing alone will not
automatically provide any benefits.
Being foolish and clever creates the same problem
because we always love daydreaming!
Borrowing and playing Lotto is our last hope
to achieve our own motivation,
survival, and prosperity at this present time!

ABOUT CHINESE CIVILIZATION: PAST AND PRESENT

Chinese civilization
is one of the oldest existing civilizations.
Originally, most Chinese came from Africa
by migrating in pre-historic times—
many of them admit this without hesitation.
Through many economic and political struggles
the Chinese people have managed
to overcome most of their crisis.
The new generation of the ruling class in China
wants to see Beijing treated
as a legitimate world power.
Economically, China has actually colonized
more than half of Africa, as well as
Brazil, Chile, Argentina, and other countries.

Not too long ago, the continental Chinese people
were gathered together under the joint gaze
of Mao Zedong and Joseph Stalin.
In 1949, Chinese youths danced in Tiananmen Square
waving the red flag right after the Communist party seized power
for the People's Republic of China.
The whole Western world watched this event on television:
the killing of over one thousand Chinese students
who were demonstrating in Tiananmen Square in 1989.
After this shocking incident
the Chinese Communist party leaders
made an unwritten and unspoken deal
with the Continental Chinese people
to stay out of present day politics.

Now many Chinese people can do anything—
whatever their heart desires.

This movement paved the way
for the current economic success
of 21st Century Capitalist China
under the Communist Government.

It became clear to the open-minded Chinese
that the Communist Government does not have a problem
with the Capitalist Economic system.
In-fact, Capitalism even exists under any corrupt government.

After so many years of being forced to participate in Communist politics
while struggling with a programmed economy
most of these Continental Chinese people are only too happy
to disengage from politics entirely.

The Continental Chinese people
have now acquired their knowledge and ability
to deal with the free-market economy and globalization.
Many Chinese citizens are now enjoying money-making
and distributing their profits for their own financial freedom.

During the last twenty five years,
more than 150 million continental Chinese people
have moved out of poverty to enjoy much better lives.
Still, millions of these Chinese citizens
are living on less than one hundred dollars a month!
In addition, they have no health insurance as we Westerners have.
When some of these unfortunate people become seriously ill
it is hopelessness that has become their final experience!

Despite Chinese economic progress,
now it is also the time for Capitalist China under communist government
to look back at many of its own people's unfortunate situations.

The great Chinese artist Ai Weiwei
who now lives in exile in Bonn, Germany
has painted the lives of those unfortunate Chinese
now experiencing terrible neglect
also in Continental Capitalist China.

Now the vicious face of Coronavirus
is something President Jinping has realized
as an economic military source which is worthless.
In recent social media pages, news has been released
revealing how Xi Jinping went to pray the Muslim's Friday prayer—
so his government must now allow the opening
of all Muslim people's worshiping!

I believe no government should ever block
their minority's religious freedom.
Instead they have to take total responsibility
to protect all other minority groups
as well as their places of worship!

RESPONSIBLE

We are all innocent by birth.
Systems, society, and civilization
are all responsible for most of our crimes
and our painful debt burdens.

Let us now build positive changes
through a business organization such as “TEGME”:
which means “Techno Economic Global Mega Enterprise.”
And I believe through TEGME’s every transaction generates profit
because TEGME has implemented
a Creative Balance For Development Theory.

If we do not get involved in this open invitation
for a positive change through TEGME
or any other Global Mega Enterprise like TEGME
then our socio-economic situation
will unfortunately remain the same
or even get worse!

OPEN STAGE UPLIFTING

The Cats Eye Student Lounge
at the University of Toronto's downtown campus
hosted an Open Mic in 2017
for poetry, singing, and storytelling
through a vigorous slogan
that inspired me to attend this event.
And this slogan was over two years ago
"Your hate speech is not free speech!"

Since this was my first time
at the Cat's Eye Student Lounge
I expected to sign up
to participate on the Open Stage.
Two organizers at the Cat's Eye Student Lounge
surprised me when they told me
this show had been rescheduled.
At this time two other shows near this Student Lounge
had also been scheduled in Norman Cristofoli's on-line listing.
One of these shows is only five minutes walking distance
from the Cats Eye Student Lounge.
This event for the open Mic
is currently called the "Queer Jam, Poetry Slam."
This event is held in the Junior Commons Room
at the University of Toronto's Victoria College.

I reached the Junior Commons Room just in time
to sign my name for the Open Stage.
The organizers informed me that I will be given
ten minutes time at the Open Mic.
When my turn came I recited six of my own short poems
and sang my signature “Climate Change” song.
I informed the audience through this song and these poems
about my prime desire to solve the Current Global Financial Crisis.
I believe we need to rescue the ninety percent of unfortunate people
who currently experience life as modern slaves.
In addition, we need to solve the Global Climate Crisis
through the practice of the Creative Balance for Development!

After this Victoria College event I then attended
the Art Bar Poetry Reading Series
at 320 College Street—
and I signed my name for the Open Stage.
Then Margaret, the host of the Art Bar Poetry Reading Series,
told me I would be given three minutes time
at the open Mic as it is scheduled for every participant.

I find it is uplifting to know
there are so many literary events
going on all over Toronto every day
helping people to convey their messages
through poetry, music, drama, comedy, and storytelling!

**WITHOUT FINANCIAL FREEDOM
THERE IS NO FREEDOM!**

Without financial freedom
all other freedoms are not freedom at all.
So many people all over the world
must accept their lives
as modern slaves!

As a human being I believe
many of us are now more open, more thoughtful,
and kinder than previous generations.

I further believe we have the resources,
knowledge, and technology
to provide everyone with a stress-free,
decent, and progressive life
based on our intelligence, talent, and dedication.

I believe we need to practice
a simple, dynamic, and progressive policy
such as the Creative Balance for Development
to strengthen our existing economic systems
for all of our debt free, progressive, modern lives.

OH, TO BE OPTIMISTIC

Yes, I am an optimistic person!
I'm inspired by the lives of Abraham Lincoln,
Mahatma Gandhi, Kazi Nazrul, Leo Tolstoy,
Charles Dickens, Maxim Gorky, Tommy Douglas,
Nelson Mandela, Vaclav Havel, Robert Sadoway,
Bayezid Khan Ponni, and today Angela Merkel
who is now guiding Germany.

Thanks to these great persons,
I believe more champions will appear
to move us onwards towards salvation.

I am not perfect, but trying my best.
With help from God, I have developed
this Creative Balance for Development theory,
and it will be useful to those
who have promised to work together
to bring us progress, prosperity, and happiness
based on our intelligence and dedication!

GENOCIDE IS A HEINOUS CRIME!

Yes genocide is a heinous crime—
a crime against all humanity!

Over the last century
we have seen the worst in us—
by the Holocaust in the Second World War.
The genocide in East Pakistan in 1971
is almost three hundred thousand East Pakistani people
mostly Muslims killed by the Muslim Pakistan army
and their local allies.
We all see now the mass slaughter of around 800 thousand
Tutsi people in Ruanda by the Hutu and Taw in 1994!

Even now why are so few of us questioning
the 30 years of systematic genocide
of the Rohingya Muslims in Myanmar?

Now why are so many war criminals
still roaming free amongst us
without being reprimanded for their crimes?

We are grateful that the United States and Canada,
the United Nations, Amnesty International,
and many other nations and organizations
are finally responding to Myanmar's Rohingya Genocide!

Now I ask you:

How are we going to stop these
and other mass crimes?

When are we going to help those victims
to get their homes back?

And why is resettling in Myanmar
really not safe yet for the Rohingya Muslims?

Now I totally support U.S. Congressmen
Bradley Sherman's proposal for bringing the Rakhine State
of Myanmar under Bangladesh territory
After all before living in Bangladesh refugee camps like animals,
Rakhine State was their true home.

**WHEN SOME OF GOD'S PURPOSES
ARE THE POET'S PURPOSES ALSO**

You are a poet
and your poetry is honest and brave.
If your poetry represents God—
then you will want your verses
to serve as guides to those people
who also believe in God.

If you believe God knows best
about love, joy, and happiness,
and about progress and peace—
then you may honestly believe
in the need for each human being
should start to practice
at least the simple and inspiring
common verses from God.

LIVING A HEALTHY LIFE

We are all very special individuals:
We are rich or poor, black or white,
native or not, male or female—
each one of us is hopefully healthy
and therefore we should feel grateful
to God for our very own powerful gift!

Yet about this special and powerful gift
touches very few people's minds and hearts
until we start to lose our physical ability.

I share my inspirational messages for everyone
and post some of these as modern poems
through our YouTube channel
to help justify our own beliefs and research—
because we know every single person can become
special and powerful if we have the opportunity.
TEGME is offering and pleading others to offer
this simple opportunity what every human-being deserve.

THE FOUR PILLARS OF ECONOMY

Land, labour, capital, and economic-plan
are the four pillars of our economy.

Implementing this policy is the roof
of our economic house and our society.

We are all part of this economy
with or without our understanding!

For our survival to do whatever we need to do
the first thing to consider is money
and all other sources of finance.

Those who don't have secure sources of finance
cannot possibly reach their desired goals.

Our Creative Balance for Development theory
is a new policy for our consumers' capitalism.

This Creative Balance for Development
is also a reliable policy and a safeguard
for our beloved universal capitalism!

Through the practice of a simple economic policy
such as our Creative Balance for Development theory,
it is now easier to establish a financial stress-free
and healthy society all over the world as if by magic!

There are many things that are not magic anymore.
When people see, feel, and understand the logic
behind these so-called wonders
such as radio, television, airplane, and cell-phones etc.
now our Creative Balance for Development theory
will hopefully serve as another useful innovation.

Some people have invented various theories
and will likely invent other essential theories in the future
based on useful requirements and other demands.

Without the implementation of the right theory or plan
inventing any new theory or policy
may not make any valuable sense and demand.

PLANTING A GREEN THOUGHT

We are planting a green thought
in “The Colour Of Your Favourite Rose.”
Our TEGME is the publisher and distributor
of this mind-blowing book of modern poetry
contributing our part for human advancement
through the launch of this poetry book.

The name of this ever-green thought
is our “Creative Balance for Development.”
In a short form we call this the “CBFD” theory
to define this dynamic economic plan.

Before the end of this whole book
then it will be your turn to do your part
if you are totally satisfied with this plan
which is “Creative Balance For Development.”
Then you may implement this simple plan for yourself
while letting others know about it’s important.

If you fall in love with this theory without hesitation,
then it will be your responsibility to feel involved
with our “Techno Economic Global Mega Enterprise.”
Or you may open another similar Enterprise
like TEGME by this free CBFD theory.
Or you could affiliate your own business
with any Global Mega Enterprise that you believe in!

REAL HEROES

It is about time
to show your courage.

Many of us can invent or innovate
ideas, theories, and proto type devices.
But very few people have come to implement
these universal idea or theory for human advancement.
Like short waves, electricity, bulbs, motors, airplanes, etc—
now Global Mega Enterprise has come forward
to solve our ongoing global financial and climate crisis
by implementing our Creative Balance for Development.

But those people who will come
to give their support to be moral
for their part of universal projects
are our own real heroes.

Some ideas take decades, centuries,
and lifetimes for many generations
just to be implemented successfully.

“Heroes” in our current world
have become gimmicks.
Sportsmen, celebrities, and billionaires
are now called “Heroes”.
But those people who truly contribute along the way
for human advancement are *the real heroes!*

THE CREATIVE BALANCE FOR DEVELOPMENT IS GENUINE FREEDOM

“Creative balance for development”
is a simple dynamic economic plan
for open-minded people all over the world
to enjoy a debt-free, progressive, and stress-free life.

It is indeed possible we may now experience
a practical route to financial freedom
in a short period of time.

You might be one of the people among us
to help re-establish love, joy, and respect
based on honesty, talent, and dedication!

Fortunately, it is now possible to offer anyone
through meaningful modern poems and songs
our realistic hope for genuine freedom.

REGISTERED CUSTOMERS

One of the core verses
of the Creative Balance for Development Theory
is telling us “a minimum of two-point-five percent
up to a six-percent revenue from every transaction
will lead us to the necessary Contributed Dividend Account
for all registered customers of the Global Mega Enterprise.

To fulfill for Employees and Shareholders alike
the necessary same amount of Contributed Dividend
which Employees, Shareholders, and Business Enterprises—
so all these four parts equally enjoy
most of the products and services
except milk, eggs, and other basic necessities for living.

These dynamic mutual funds
with some other funds from the same transaction
simultaneously will finance twenty-four hour cycles
to invest hoping to re-generate profits for everyone
through many friendly-environmental businesses.
The administrative fee of these dynamic mutual funds
minimally must remain two-point-five percent.”

REMAIN FAITHFUL

Dear Sonya and Simon,
my newly married friends
who live at Twenty Avoca Avenue
in Toronto, Canada.

I wish you all the best
and I pray to God
you may remain faithful
forever to one another.

You are another couple
who proudly prove again
that love is bigger than skin colour
to express your own happiness—
and your love for each other.

HOW NOT TO FEEL TOTALLY HOPELESS

When a happy couple
loses their partner forever on this earth
then no one can read their mind
or make them feel like laughing anymore.

Dear friends and relatives,
whenever I meet you
or think about you
or see your postings on Facebook,
then I feel your agony and anxiety.

While I don't have any words
to soothe you right now,
it might be helpful for you
not to feel totally hopeless.
But try to remember the kindness of God
by asking Him to help you
and all of us!

A MANIFESTO FOR OUR CONSUMER CAPITALISM

Dear Uncle, your sudden phone call has touched me deeply
through your apology and explanation
about what happened to you the last two months.
Suddenly, you went to Bangladesh with your mother
responding to the sad news about your grandmother's third stroke.
You were shocked to see the health care business in Bangladesh.
Also, the way the Hasina Awami League rigged the 2018 election
in the false name of democracy—which Hasina has been practicing
in her totalitarian government for the last ten years!

At the end of our latest conversation
you set up the time for our next meeting
concerning your return to Toronto from Bangladesh.
Uncle Fahim, just a day after your phone call to me,
I have regained my hope and confidence
and my courage and strength
to help move all of us forward.

Concerning the launch of *The Color of Your Favourite Rose*
no later than my 59th birthday August 23rd, 2020,
I believe we need at least two more months
before the launch of this book.
We have to set up this new system
that we are sharing on the internet.
Now I hope it is clear to you about our purpose
to compose *The Colour of Your Favourite Rose*
because this is not only a book of modern poems,
proses, and philosophical statements in poetic formats—
it is, in fact, a glimpse of our manifesto for Consumer Capitalism.

Techno Economic Global Mega Enterprise stands for TEGME

TEGME started doing business in Toronto in 2014.

TEGME is an environmental friendly business organization.

Techno Economic Global Mega Enterprise is its full name.

This is a new model of global business organization.

TEGME strives to be a financial safeguard for any person who is motivated to use TEGME's business plan.

TEGME's main beauty is its dynamic business plan

which stands for Creative Balance for Development.

TEGME encourages people to think about this cost-free policy.

The slogan of this friendly environmental business organization is "to provide the best products and services at a reasonable price."

Creative Balance for Development is an open economic plan which has been composed in simple sentences.

TEGME's purpose is to generate profits for all its customers.

TEGME wants you to enjoy the profits

mainly to make you a healthy customer

on a priority-basis for all your transactions.

TEGME needs to finance its mega projects

on a daily basis by distributing all its mutual profits

and the finances of others.

TEGME's dividends strive to be issued on a quarterly basis

always a profitable business organization!

WHO DOES GOD LOVE?

God inspires people to think positively.
God teaches us to accept what is right,
and to ignore what is wrong,
and to not become greedy and violent.

It so happens that my first imaginary child
is what I call the “Creative Balance For Development.”
This imaginary child (she or he)
could become anyone’s sweetheart
because our heart is the organ
everyone feels and uses to judge right from wrong.

I believe God is the living source
of love, joy, and happiness.
This source is what helps each of us
to enjoy financial freedom as well.

Sadly, those who do not experience
any financial freedom
may find it difficult to practice
even the guidelines of God.

Yet, anyone may build up
a financial stress-free, progressive, and joyful life
if he or she practices this very humane policy
that we call the Creative Balance For Development.

ARE WRITERS DOING ANYTHING WRONG?

Writers and poets mostly write their thoughts, visions, social prosperity or social crises & their solution.

They write about love, respect, neglect, deprivation, sadness, conspiracy, war, romance, drama, etcetera through various literacy formats.

And they eagerly expect their intellectual property will eventually be published for human advancement or for their name, fame, recognition, and financial gain.

Publishers mainly promote their intellectual properties and distribute the various formats of these works.

They definitely assume these intellectual works will be a financial benefit to publish.

Since self-publishing opportunities have become available more intellectual properties are now being published.

Some works rejected by numerous publishing houses have later earned successful recognition such as:

Moby Dick, Harry Potter, Dune, Lolita, Gone With the Wind, and recently The Best Laid Plan by Canada's Terry Fallis.

If a writer or poet longs to be a publisher himself or herself, he or she needs to market and promote their literary works.

And they hope their message and vision will be widely spread. Are they then doing anything wrong?

OPEN INVITATION FOR OUR TEGME PARTNERS

TEGME is openly inviting enthusiastic readers and listeners of “The Colour of Your Favourite Rose” to become partners or shareholders of TEGME.

Therefore a smooth operation of this hope fully a pioneer Global Mega Enterprise— TEGME has now issued an identifiable code called the “Creative Balance for Development Number” on the back cover of every copy of “The Colour of Your Favourite Rose.”

Anyone could join TEGME through a “Creative Balance for Development Number.” You may earn a “Creative Balance for Development Number” through buying a copy of “The Colour of Your Favourite Rose.” Or you might receive this book as a gift from someone. Anybody can download this whole book free of charge through www.favouriterose.tegmecbfd.com I hope you will be satisfied with this book before purchasing it.

One number will only be used for a single account.

But even if you cannot get your own unique number,
you could still experience the core value of this book.
The amount of this one and only start-up capital,
is thirteen percent of the retail price of this book.
This is the special contributed dividend
at all times for everyone around the world.

When a small cup of Tim Hortons coffee
is \$1.62 including tax, in most places in Toronto
then a soft cover retail price
for “The Colour of Your Favourite Rose”
is thirty Canadian dollars with tax included
in Canada and Bangladesh.
Everywhere else, it is thirty U.S. dollars including tax.
Shipping and handling is extra if you buy online.
The e-book costs nineteen percent less than the soft cover
of “The Colour of Your Favourite Rose.”

TEGME'S MAIN GOAL IS TO BUILD A GLOBAL RENEWABLE ENERGY PLANT

Creative Balance for Development

is a simple scientific economic plan.

Through this theory, TEGME's goal is to build

a global renewable energy plant—

but it requires a humongous collective effort and finance!

Now through the Creative Balance for Development theory

a collective finance might generate all through the year.

TEGME also has a plan to build green cities

and many other green businesses all around the world.

TEGME's plan is to do multilevel businesses,

and also to promote “The Color of Your Favourite Rose”

which is TEGME's first production and product.

Now come on everyone from near and far

to become a part of TEGME's green movement.

Through this movement hopefully

we will collectively re-establish

courage, love, joy, respect, tolerance,

and financial freedom for everyone.

Then, people should feel and appreciate

honesty and bravery again in their daily lives.

Now I am hoping you will ask your heart

about “The Colour of Your Favourite Rose.”

Then you might see the soul of this book

and you would also be motivated to enjoy

more benefits which you deserve

as an open-minded person.

**DEAR READERS AND LISTENERS,
I WISH YOU WELL**

Yes, dear readers and listeners—
let me thank you for your interest
in this book of modern poems.

May God help us to know
what is the best way to develop
our mutual humanity—while giving each of us
the opportunity to work side by side to help one another!

This is my prayer: Dear God,
please give us the opportunity
to know the purpose of our human lives.
Without Your special kindness no one can escape
from the seductive spirit of evil!

Dear God, please help us to develop our courage
to do what is right for our own happiness
and the richness of humankind.

Let us always know what is right and what is wrong,
which is why we need to read and listen for understanding
to many other holy books with an open mind.
May these holy books might help us to understand
what God wants from each of us
is our happiness and our peacefulness!

TO DEPEND ON THE KINDNESS OF GOD

Those who love to see
freedom and beauty in action—
not only for you and me, but for everyone—
are worthy of thinking through a practical way
of achieving this realistic goal.

It is logical to believe in this theory
which states that anyone can achieve
financial freedom and enjoy beauty
by following a simple dynamic policy.

Unfortunately,
real life is full of deprivation due to greed
which exists under different names
in most countries.
Many people are victimized
by terrible greed and gluttony.

Fortunately, some people
are now proudly practicing
our Creative Balance for Development plan.
This approach is peacefully closing the gap
between the rich and poor.
This only depends on the kindness of God
and our own openness.

Epilogue

The Colour of Your Favourite Rose seeks to utilize anecdotes, imagery, and allegory to illustrate the different ways we as human beings communicate with our inner selves. Mizan tackles controversial subjects in a frank and decisive manner. He seeks none of the appeasement tactics of the modern age. Instead, he emphasizes his Creative Balance for Development theory.

This is not the poetry of a verbose poet of the mind, but the clear and intense emotionalism of a poet of the heart.

- Mugabi Byenkya

My many years of friendship with Mohammed Mizan is unique. His open mind, progressive thinking, and his confidence are remarkable. Ours is a different kind of friendship. While we seldom meet, we have an admirable place in our hearts for each other.

Mizan's talent is a hidden treasure like the dynamic lava of a volcano. His work illustrates his thirst for a just world—his love for humanity—and our mutual responsibility for this beautiful planet. Mizan's smooth writing style and his choice of words reveal his eloquence.=

- Kazi Nesar Ahmed

Mizan lived and raised his family in our neighbourhood Crescent Town for many years. We continue to meet each other frequently. Now every time I see Mizan I am treated to his poetry. This inspires me and helps me to think positively that there is still hope for change and a better life.

Mizan is a great poet. His poems are practical and depict the problems that cause so much pain to the inhabitants of our Planet Earth. Mizan's solutions will bring real happiness and lasting peace for all of us to enjoy. I continue to read his poems and find each poem to be a masterpiece. I highly recommend Mizan's wonderful collections of poems for people of all ages and cultures.

- Wazir Mohamed

Biography

Mohammed Mizan, with his talent for writing and his dedication to solving the global financial crisis, invented and unveiled his Creative Balance for Development theory in 1992. Since then, he has travelled to many countries to help people understand the socio-economic systems which illuminate their lives. With these goals in mind, in 2013 he launched his first book of poems, Oshojjo. In the same year he also released his first music album, Kal Ghum Vangata. In 2015, he released his second music album, Blessing. Also the Voices 2018 and 2019 contain four of his poems of this book.

Presently, he continues to spread his message through poetry, short story and songs mostly through tegme literary show. Now his deepest intention remains to help stop climate change through bringing financial freedom to everyone those who wants.

He currently lives in Toronto with his wife and three daughters.

Creative Balance for Development Number: *****

NOW YOU AND ANYONE COULD ENJOY FINANCIAL FREEDOM AND
HELP TO STOP CLIMATE CHANGE THROUGH THE USE OF THIS BOOK

From an early age, I, Mohammed Mizan, have been seeking the answer to the purpose of human life.

After years of following the steps of a few intelligent mentors while I was travelling to a few countries of the world, I came to the realization that the main ingredient is acquiring and applying knowledge.

Knowledge is only as useful as its applications. There have been many theories in the past that were discovered decades prior to someone finding useful applications. It was not until these applications were found that ideas were fully appreciated in today's world.

Mankind has been troubled with many devastating predicaments—such as climate change and poverty and hunger and the violation of human rights, just to name a few. It is now up to us who are living in prosperity to find the solutions to bring usefulness to those people in need. Hopefully, with help from God, *The Colour of Your Favourite Rose* has now become one outcome of this important endeavour.

To conclude: *The Colour of Your Favourite Rose* is a book of modern poems that explores a simple idea to bring everyone into an opportunity to help stop climate change and to gain financial freedom based on our smartness, talent and dedication. This book was written in a simple language to encourage anyone of any age and background to become part of this desirable solution.

Now by the name of almighty GOD, I am bringing my belief concerning this application to be a simple solution for everyone including our earth!
